FOR: WHOEVER MAKES SOMETHING LOOK LIKE US

ANDREW SHIPMAN

RALLY IS

how you get your group to "*let's f* cking goooooooo!!!!*"

Group trips are the magnum opus of what good friend groups do. Rally is the daydream you build together, the countdown that makes Tuesday tolerable, and the page your friends can't say no to — not because you sold them, but because you got there first and they want what you're having.

Rally doesn't serve the individual organizer. It serves the friend group. The organizer starts the rally — the group makes it real.

🔥 say less, i'm in

LFG.

💸 spend the rent money

THE THESIS

Housing is unaffordable. Careers are uncertain. The only investment that pays back reliably is the *trip you take with your best friends.*

Rally is built for the generation that decided experiences are the new equity — the only thing worth saving up for is the next memory. So much of friendship is mediated by phones now that most of what passes for "hanging out" is reacting to each other's stories. Rally exists to push friendships off the algorithm and into the same physical room.

We don't want you to live in our app. We want you to live in a hot tub in Vermont with five of your favorite people. The app's job is to make that happen — then get out of the way.

THE PUNCHLINE

> *Rally is a doorway, not a destination. Nobody opens the app the day the trip starts — they're too busy living it. That's the win.*

a little too much 🔥

THE VOICE

friend-of-a-friend in the *group chat.*

Not the brand talking *at* you. Not the brand talking *as* you. The slightly cooler third party who's already been to Lisbon and is texting you what you actually need to know. Knowing but not condescending. Hyped but not cringe. Says **"the vibe is immaculate"** without irony.

never the words "trip planner."

🎨 six variables

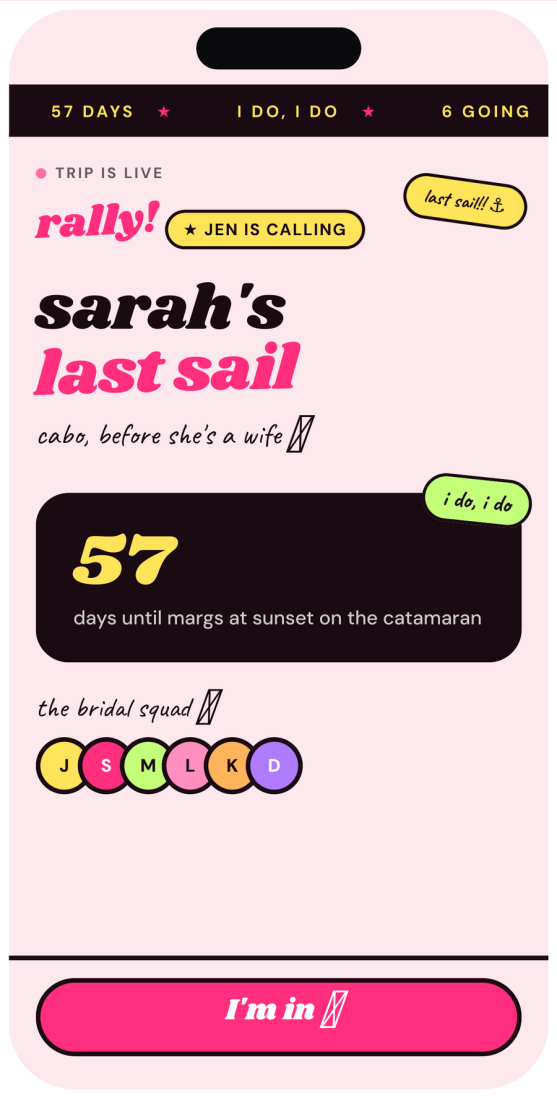
THE THEME SYSTEM

same bones. *17 vibes.*

Every trip page runs on the same chassis — same six CSS variables, same layout, same sticker recipe, same motion language. Only colors and copy flex.

Weekends · Big trips · Milestones · Chill. Every theme maps to a real friend-group occasion. None of them are "couples trip for two people" — that's a different product. The next pages are the six that best stress-test the kernel. There are eleven more.

17 moods 🎭



OCCASION · DEFAULT BRIDAL

01 Bachelorette

last sail!! ⚓

Hot pink, lemon, lime. The default for sail-her-off-into-the-sunset weekends, and the loudest theme in the set.

BLUSH · HOT PINK · LEMON · LIME · INK

COPY VOICE

"last sail!! ⚓ "

"sarah's last sail"

"the bridal squad"

COUNTDOWN FLAG

"i do, i do"

CTA

I'm in 💍

SETTING · BIG TRIP

02 Beach Trip

Sea foam, coral, sun. For Tulum, Tahiti, the Outer Banks — anywhere salt meets sunset and the group chat starts dropping flight screenshots.

SEA FOAM · CORAL · SUN · TEAL · DEEP INK

COPY VOICE

"vamos 🌴 "

"days until salt water and zero service"

"the birthday crew"

COUNTDOWN FLAG

"vamos"

CTA

I'm in 🐚

SETTING · THE DARK MODE PRESSURE TEST

21 days 🌃

05 City Weekend

Charcoal, cream, hot magenta, electric cyan. The proof that the chassis is dual-mode — same kernel, flipped surface vars. NYC, Tokyo, Mexico City after dark.

CHARCOAL · MAGENTA · CYAN · SUN · CREAM

WHY THIS THEME MATTERS

*The dark mode entry pressure-tests the kernel: the three dual-mode vars (**stroke, surface, on-surface**) flip, everything else inherits.*

COPY VOICE

"let's gooo 🌃"

"4am bodega slices"

CTA

I'm in 🌃

SETTING · BIG TRIP

04 Euro Summer

Linen, burnt orange, olive, ochre. Mykonos, Mallorca, Puglia — anywhere with too much olive oil and a rental fiat panda.

LINEN · BURNT ORANGE · OCHRE · OLIVE · ESPRESSO

COPY VOICE

"ciao bella 🍋 "

"aperol on a balcony at noon"

"questionable jet skis"

COUNTDOWN FLAG

"ciao bella"

CTA

I'm in 🍋

SETTING · WEEKEND

03 Ski Chalet

Bone, oxblood, ochre, forest. Park City to Niseko. Same chaos — in a Filson jacket. The boys-weekend default.

BONE · OXBLOOD · OCHRE · FOREST · INK

COPY VOICE

"send it 🥃 "

"first chair and last call"

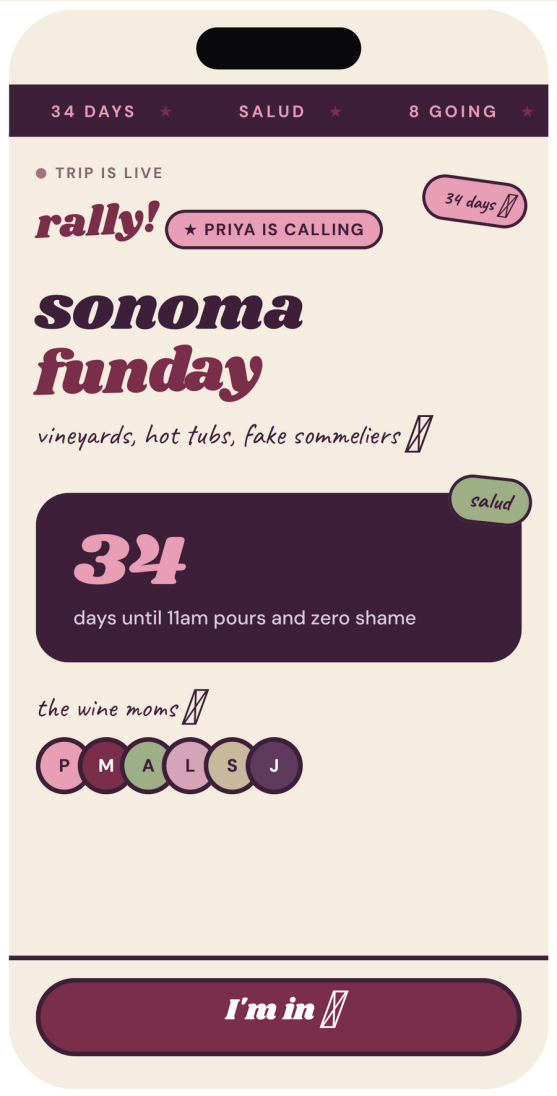
"ski hard, après harder"

COUNTDOWN FLAG

"send it"

CTA

I'm in 🥃



SETTING · MILESTONE-ADJACENT

06 Wine Country

Bone, plum, rose, sage. Sonoma, Willamette, Tuscany — for people who pretend to know wine but absolutely know how to ruin a pool deck.

BONE · PLUM · ROSE · SAGE · AUBERGINE

COPY VOICE

"salud 🍇 "

"11am pours, zero shame"

"the wine moms"

COUNTDOWN FLAG

"salud"

CTA

WHAT THE SIX THEMES ABOVE SHARE

the kernel is six variables.

Every theme flexes by changing **six CSS custom properties**. Nothing else. The layout, motion, stickers, countdown, sticky CTA, marquee, and avatar row are identical. Change the six — get a new vibe. Change anything else — break the brand.

`--bg`
page background. the theme's mood color.

`--ink`
body + outlines + avatar strokes.

`--accent`
the wordmark bang + CTA button + live-dot.

`--accent2`
the FOMO flag on the countdown card.

`--sticker-bg`
sticker fill + marquee text + countdown number.

`--surface`
the dark surface of the countdown card + marquee.

DARK MODE IS FREE

City Weekend (theme 05) proves it. Override three extra vars — **--stroke, --surface, --on-surface** — and the whole kernel flips without a second stylesheet. Any theme can go dark by redefining the same six plus three.

WHAT DOES NOT CHANGE BETWEEN THEMES

Wordmark in Shrikhand · marquee motion · countdown card shape + drop shadow · sticker recipe (caveat, rotated, outlined, 2px stroke) · eyebrow pill · FOMO flag geometry · avatar row · sticky CTA with 4px box-shadow offset · entrance animations · the 2px outline on everything saturated.

THE WORDMARK — LOCKED V0

Set in **Shrikhand**. Always lowercase. The bang is never optional — it's half the logo.

DO

- Always lowercase *rally!*
- Bang in accent pink on light bgs
- Bang in accent lime on dark bgs
- Min size 24px (display), 18px (nav)

DON'T

- No outlines, drop-shadows, or gradients
- Never substitute DM Sans or Instrument Serif
- Never drop the bang (except tiny nav)
- Never italicize — Shrikhand is already slanted

THE CORE PALETTE

six variables. 17 themes.

Per-theme vars shift the mood. The brand-level anchors — the ones that make any surface *feel Rally* — are below.

THE FOUR TYPEFACES

rally!
SHRIKHAND · WORDMARK ONLY

Days until vino.
DM SANS · UI + DISPLAY

INSTRUMENT SERIF · EDITORIAL

CAVEAT · HANDWRITTEN ACCENT

STICKERS · V0

emoji in. *personality out.*

v0 ships with **no custom illustration kit**. Stickers are emoji only, applied with the Rally sticker treatment. The treatment is the brand, not the glyph.

THE RECIPE

Pill: `padding 6px 14px` · `border-radius 999px` · bg = theme accent · font-weight 800 · font-size 11–13px · lowercase · letter-spacing 0.04em · rotate(−2° to +2°) · `box-shadow 2px 2px 0 rgba(0,0,0,0.12)`. Never animate on load — they're stamps, not motion.

RALLY!

THE FIVE-QUESTION TEST

a surface is on-brand if all five are yes.

01 If a 26-year-old taps this link cold from a group chat at 11pm on a phone, do they understand the trip in 10 seconds?

02 Does it make at least one person in that chat say "*okay yes*"?

03 Does it sound like a friend, not a calendar app?

04 Is it a little *too much* in at least one dimension — color, type, copy, or motion?

05 Would I want to re-open it on a Tuesday at 3pm?

If any answer is no — it's not Rally yet.
